

Kevin McGowan

Field Sales Representative

Schlumberger Shallow Heavy Oil

“Primary Casing Cement Leak Detection and Repair”

BIOGRAPHY:

Currently Kevin is the Field Sales Representative for Schlumberger Shallow Heavy Oil.

Kevin started with Schlumberger in 1997 in Brooks as a shop hand / gun loader. He worked his way up to driving a wireline truck in 1999 to operating a wireline unit in 2001. Kevin was transferred, with Schlumberger to High Level, Alberta in 2004 to open a base specializing in Radioactive Tracer Logging.

In 2006 Kevin was transferred with Schlumberger back to Brooks to become the Service Quality Coach for Cased Hole operations.

Kevin was promoted in to the role of Field Service Manager for Brooks, Swift Current, Estevan and Strathmore Cased Hole in 2006.

Kevin relocated to Lloydminster in December 2007 as Field Sales Representative.

Kevin gave presentations to 3 classes of Petroleum Technology students in 2004 on Cased Hole Cement Evaluation Theory and Techniques.

ABSTRACT:

Our presentation will be on using on new sound log techniques, combined with optimized fluid selection based on the noise logs, borax logs and injection rates. The fluids used would be short polymer gels; micro-cement optimized with particulate sizing; and conventional squeeze cements.
